Regional Agricultural Show Development Grants Program Project plan template

It is a mandatory requirement that the project plan template is completed and uploaded to your grant application form.

Directions: provide a complete project plan using the table below. The amount of detail you provide should be proportional to the size and nature of the project.

The project plan should include:

- a list of the activities and indicative start and completion dates (if funded)
- consideration of risks and how they will be managed
- additional comments.

Note that the project plan does not need to include details of funding requested – these must be included in the separate budget template.
